

DC Power Systems

We are a young and growing company is looking for someone that has international experience or has studied international shipping and regulations. We have international experience to provide guidance.

Description:

Evaluate our international business which is in its infant stages and propose an international shipping and documentation process to include denied party screening, documentation, C of O marking, HTS classification and commercial invoice preparation etc. Evaluate the domestic shipping process, carrier selection and rates etc. Provide suggestions for improvement in terms of process and documentation etc. Validate our current plan for opening more DCs.

Student will need to be focused
