**Subject:** CALL FOR FYE PILOT FACULTY

Dear colleagues:

Attached (and also appended below) please find calls for applications for the position of FYE Pilot Coordinator and FYE Pilot Instructional Faculty.

This is a second call for applicants, which has been revised to reflect the feedback from the Senate Educational Policy Committee and other interested faculty. The most significant changes are:

- The projected starting date for the pilot has been deferred to Fall 2006;
- The Fall 2005 semester will be devoted to development of the FYE instructional content by the selected faculty team and Coordinator and to refinement of the pilot program (including assessment protocols);
- The Spring 2006 semester will be devoted to review and feedback of the resulting more-developed pilot program design by the appropriate consultative bodies.
- The WTUs to FYE Pilot instructional faculty has been reset at 4 WTUs per semester for the year-long program.

Please give this call for applications your serious consideration. The participating SSU faculty have an opportunity to contribute to the development of an excellent First Year program and—ultimately—a nationally recognized undergraduate baccalaureate program.
