

# GREEN CAMPUS PROGRAM SONOMA STATE UNIVERSITY

## Who and what is the Green Campus Program?

SSU is one of six Universities currently active in The Green Campus Pilot Program (the others are UC Berkeley, UC San Diego, UC Santa Barbara, Humboldt State, and CSU San Bernardino). Green Campus students at each school work with students and campus staff members to identify ways to save energy on campus, while building overall awareness regarding on energy issues as they relate to the environment.

## How you benefit?

As a student living in the dorms, a portion of your rent is directed to paying energy costs for your housing. Long term effects of wise energy use by students, faculty and staff may result in dollar savings that can be directed toward campus events and much needed student facilities. In addition to saving dollars on energy usage, you have the benefit of knowing that you're contributing to a cleaner atmosphere for everyone! As human population growth increases, and non-renewable resources become more scarce, energy conservation and awareness will be essential life-skills for us all as we approach the next century.

As an added incentive to participating in Green Campus Program activities at Sonoma State, you may be eligible for FREE stuff!! Last year we gave away **iPods**, a **new bicycle**, and **energy-saving lightbulbs**; for the coming year we have a host of new prizes lined up! So, be sure to keep an eye out for upcoming Green Campus events at SSU!
