

Study Abroad

STUDY ABROAD IT'S EASIER THAN YOU THINK!

2011-2012

From all over California, thousands of **REAL PEOPLE** just like you study abroad. Study in Asia, Australia, Europe or North or South America, and add an international dimension to your education and your outlook.

Employers want **REAL WORLD** experience. Study abroad and acquire international skills and global understanding. Your employer will value your ability to look at things from different points of view.

Live abroad and see the world in a whole new way. You will get a **REAL EDUCATION** by living in the community and learning a new language and culture. Study abroad. It's easier than you think!

GAIN A COMPETITIVE EDGE

Acquire the international experience you'll need to compete in the job market. Study abroad and stand apart from the rest.

ENHANCE YOUR EDUCATION

Stay on track and take courses in your major or supplement your degree. Learn another language or earn a minor that will enhance your university degree. Plan ahead and studying abroad won't delay your graduation.

IT'S MORE AFFORDABLE THAN YOU THINK

IP is the most affordable study abroad option available to CSU students. Why stay home when you can earn CSU credit overseas for about the same amount of money? Financial Aid applies, and scholarships are available.

Study Abroad

The CSU International Programs

International Programs (IP) is the systemwide study abroad program of the CSU and provides students with international academic opportunities in the framework of a California State University degree program. IP is affiliated with over 50 distinguished universities and other institutions of higher education in 19 countries. Currently in its 48th year of continuous operation, the academic excellence of IP has been recognized by respected organizations such as the Council on Learning and the Western Association of Schools and Colleges. With a special focus on academic year studies, IP is a unique part of the spectrum of study abroad opportunities available to CSU students. IP's guiding principle is that students should be "immersed" in the academic and living environments of their host countries. Accordingly, all instruction is offered by recognized host universities or by distinguished host country faculty.

Eligibility Requirements

Eligibility requirements for each program are provided at: www.calstate.edu/ip. Most programs require a 2.75 GPA while others require a 3.0. In a few cases, students who do not meet the GPA requirement can still be considered.

Applicants must be enrolled in a CSU campus or be eligible to transfer from a California community college. Many IP programs are open to students with sophomore standing or higher, while some require upper-division or graduate standing. Talk to your IP campus coordinator or see www.calstate.edu/ip for specific information. Some programs are more competitive than others. When there are more applicants than places available, the best qualified are selected.

Financial Aid

If you qualify for financial aid at your home campus, it will apply while you are participating in the IP program (except work-study). In addition, there are scholarships available for study abroad.

How to Apply

First, visit your IP campus coordinator. Applications are available online at: www.calstate.edu/ip. Applications are due February 1 for most programs; May 1 for Australia, New Zealand and South Africa.
