

To Whom It May Concern:

**\*\*Stellar Energy GP, Inc. is seeking interns for Economics Majors for the Fall Semester\*\***

**Position Description:** We are seeking solar analyst interns that would be supporting sales efforts. Solar Analysts are a critical component to understanding the viability of solar projects. You will learn how to decipher when a project is viable, analyze energy usage data, create system size targets and draw out preliminary sketches that show equipment locations. In order to do this you will first visit a site, then pull google earth aerial images into AutoCad and scale them, decide how much solar a site can handle, determine how much production the solar equipment will produce, determine how much \$ value the solar energy has and finally help sales create proposals using the figures and documents you have created. In order to do this Stellar will provide you with a laptop (that will stay in our offices) which will have all the software on it necessary to complete the above mentioned tasks. It is highly recommended that the candidates demonstrate strong abilities in Microsoft Office and in particular Excel. Stellar will also cover all expenses related to the job and you will be trained by both of our full time Solar Analysts.

**Pay:** \$15/hr for part time

**Time Commitment:** Fall Semester, but if intern looks to be a good fit for our organization we would like to roll them into full time employment for early 2011. Salary and compensation to be negotiated at that time.

Please send your resume to Chris Hiller by email [chiller@stellarenergy.com](mailto:chiller@stellarenergy.com) or fax 707-992-3299.

Stellar Energy is a top tier EPC Contractor who designs, procures and builds Solar Electric facilities across North America. Our projects range in size from \$1M to \$30M. We are owned by Itochu International which is a global 500 company.
